

Important: Read all instructions prior to installation.

Selectable CCT and Wattage LED Flood Light

Safety and Notes

- Product should be installed and serviced in accordance with applicable national, state, and local building and electrical codes.
- To reduce the risk of electric shock, ensure that the main power source and circuit breakers are switched off before performing any installation or wiring procedures.
- Avoid looking directly into lamp when illuminated.
- Ensure all mounts are securely attached and will support the weight of the fixture. Failure to properly support fixture may result in damage or injury, for which the manufacturer does not assume responsibility.
- Proper grounding is required to ensure safety.

FLCTM-SW3B250-TLPM

Specifications

Model	FLCTM-SW3B250-TLPM
Operating Temperature	-40 to 45°C (-40 to 113°F)
IP Rating	IP65
Environmental Rating	Suitable for Wet Locations, Waterproof

Check product label for specific electrical specifications related to installation.
Improper installation will void warranty.

CCT and Wattage Selection

Remove the switch cover using a screwdriver and adjust as needed. Replace cover when finished to protect switches.

Wiring Diagram

Important: Read all instructions prior to installation.

Selectable CCT and Wattage LED Flood Light

Installation Instructions (Included Trunnion Mount)

NOTE: Disconnect supply power before installation

1. Mark and drill holes for mounting and wiring.
2. Tighten nuts to secure light to mounting surface.
3. Make electrical connections per wiring diagram.
4. Loosen bracket screws and adjust to desired angle.
Tighten screws to secure.
5. Select desired CCT and wattage settings (see above).

Photocell/Shorting Cap Installation

1. Remove photocell access plate and attach photocell receptacle socket.
2. With supply power off, make all wiring connections (see wiring diagram).
3. Photocell plugs in and twists to lock.

Follow the same steps for shorting cap installation.
